

# ABOUT JOHNSON & ASSOCIATES

## We are the law firm of tomorrow

We are a young firm with experience and technological fortitude. Since our inception, we have always focused on our clients' needs. We know that through accessibility and our implementation of technology we set certain levels of comfort. We are here to guide and advise you in order to produce a favorable outcome on your behalf.

## Expertise

Our staff has handled over 10,000 cases. Our team of attorneys consult with each other to make sure the client is placed in the in the best possible position, thus ensuring a more favorable outcome.

## Accessibility

The biggest complaint is "I can't get in touch with my attorney" or "I can't obtain my case files" but we have taken care of that. We are just a phone call away, an email away or a visit away from one of our many convenient locations. Our clients have access to an online portal that interfaces with all parties involved, giving you the ability to upload documents, download documents, make payments, and provide updates. It is all at your disposal.

## Creativity

"Through passion and desire, ingenuity is born." Everyone at Johnson & Associates is encouraged to think outside the box. From the top down and back up to the top, all ideas are welcomed. Our colleagues are compensated for their inventiveness. We are constantly seeking to improve, this is why we developed the interactive portal and developed technology through an app. Through these avenues we provide relief through trying times.

## Value

Throughout our organization each person brings some level of experience. Our principal has worked on Wall Street. Here he purchased and sold over 100 companies, some of our employees have owned businesses or their parents have successful businesses. Due to our vast experiences we can provide consultative services. These are invaluable as we provide a solid foundation on which to build on and help you succeed
